1. Bottom Up Features:

The Mek SpectorBOX bottom up modular AOI is optimized for the inspection of THT solder joints and detection of solder bridges and solder balls. It is designed to inspect PCB's inside solder frames directly from the conveyor system. With it's totally newly developed mechanical platform, it is the only modular AOI in the market that can be equipped with 9 cameras: 1 top and 8 side cameras. The bottom up SpectorBOX is configurable with one of two different optical units: FDLz and FDAz.

	Angular Camera's	Z-Axis
FDLz	NO	YES
FDAz	YES	YES

High grade Telecentric Lens

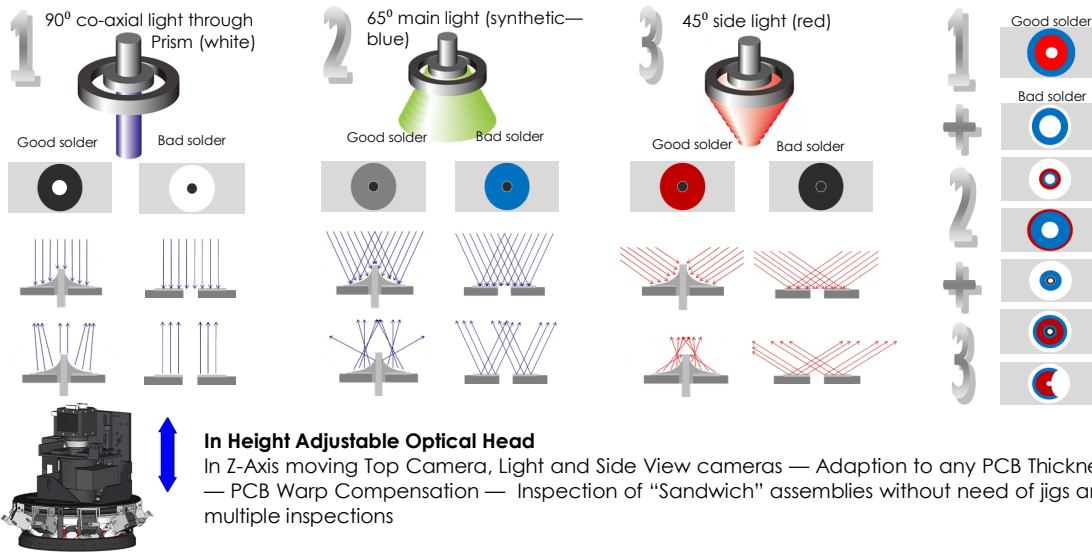

Parallel image over the whole sensor/lens Field of View — No parallax effect

Large pixel image capturing sensor

18,8 μ m² pixel size — smooth and detailed image with great dynamic range — Japanese built

Omnidirectional multi angle, multi color LED lighting

3D color profile of solder meniscus — accurate defect decision by the software algorithms — Detect all visual defects of THT solder joints and easily detect bridges and solder balls

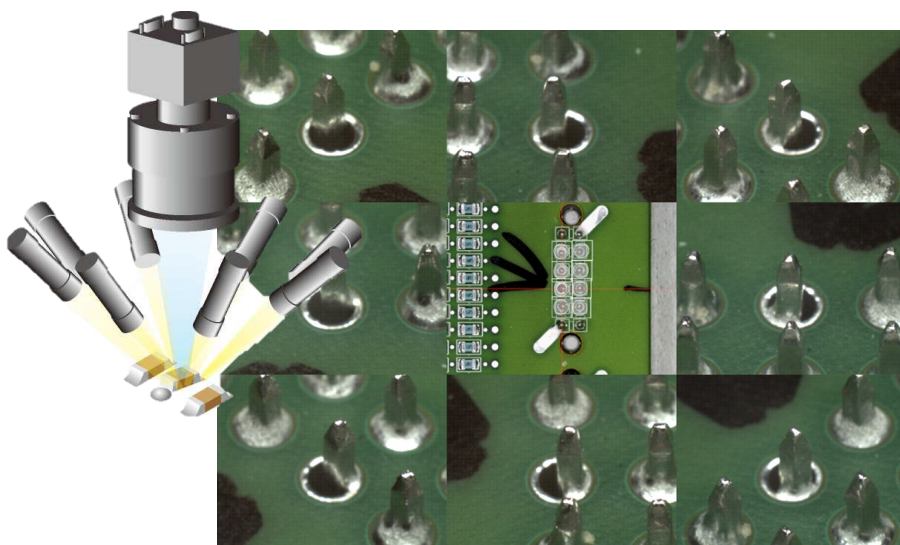

In Height Adjustable Optical Head

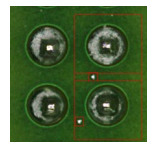

In Z-Axis moving Top Camera, Light and Side View cameras — Adaption to any PCB Thickness — PCB Warp Compensation — Inspection of "Sandwich" assemblies without need of jigs and multiple inspections

8x Angular Side Sensors (Only available for FDA and FDAz models)

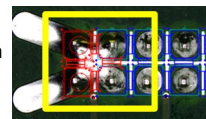

Simultaneously operating, multiplexed side view sensors with CameraLink interface — 45/45 arrangement — Triple use: Active automatic inspection, classification and repair — clear 9 angles defect review — high magnification 50x (10 μ m/pixel) — Full Color — Auto highlight — Large sensor pixels — 9 view images also in backup database

Powerful algorithms for solder bridge detection

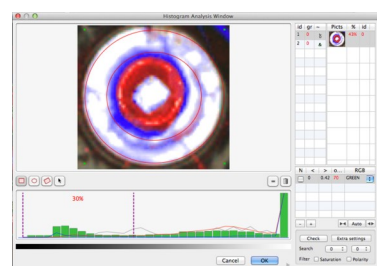

Dedicated algorithms for solder balls detection

Histogram Analysis algorithms

Condition based decision — Tolerances can be set tightly — Close to zero false alarms

2. Top Down Features:

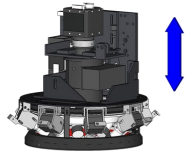

The Mek SpectorBOX Top Down modular AOI is optimized for the inspection of THT components to find any visual defect like presence/absence, wrong polarity, colour, type, bent pins etc. It has a top clearance of 130mm (5.12") so inspection can be done even when the tallest components are placed. It is designed to inspect PCB's inside solder frames directly from the conveyor system. The SpectorBOX Top Down module can be equipped with one top camera and 8 wide field of view side camera's. Available optical units are FWz and FWAz.

	Angular Camera's	Z-Axis
FWz	NO	YES
FWAz	YES	YES

Large pixel image capturing sensor

18,8μ² pixel size — smooth and detailed image with great dynamic range — Japanese built

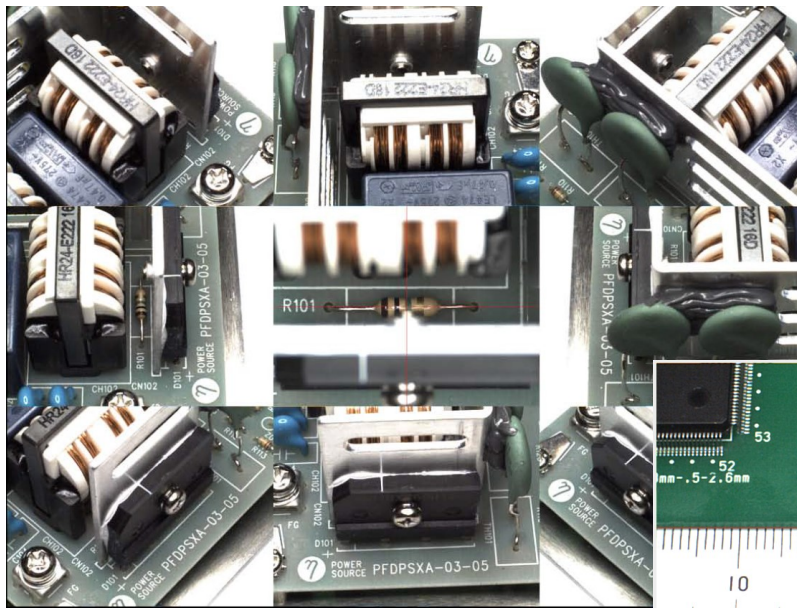

In Height Adjustable Optical Head

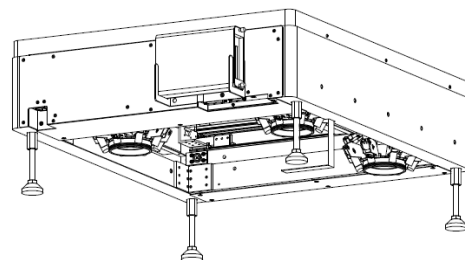

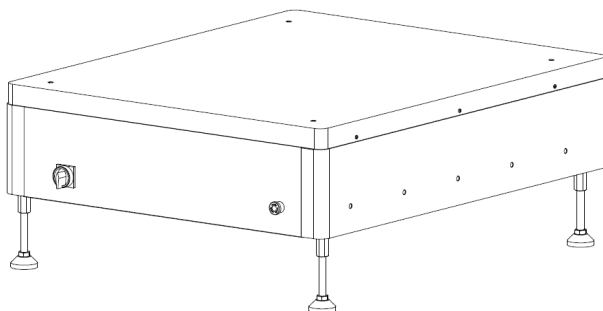

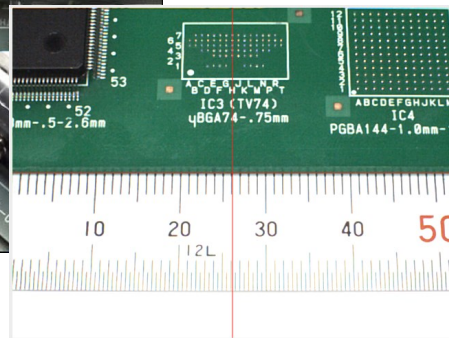

In Z-Axis moving Top Camera, Light and Side View cameras — Adaption to any PCB Thickness — PCB Warp Compensation — Reliable text and/or polarity inspection on tall components — Inspection of "Sandwich" assemblies without need of jigs and multiple inspections

8x Angular Side Sensors (Only available for the FWAz model)

Simultaneously operating, multiplexed side view sensors with CameraLink interface — 45/45 arrangement — Triple use: Active automatic inspection, classification and repair — clear 9 angles defect review — Full Color — Auto high-light — Large sensor pixels — 9 view images also in backup database
